Fax #	805 528 9371	Fax #	805 549-3147		

Dear Mr. Bucl:

...

- Pages ES-4 and I-5 state (and indeed emphasize the importance) that some studies suggest that decay of natural vegetation, rather than septic systems, is the source of nitrate contamination of ground water. The report must reference and document with studies substantial this statement. Otherwise these statements should be deleted. Only statements that are scientifically valid and supported by data should be included in the report (not hearsay). These statements lead a reader to question the need for the project and intentionally reduce public confidence and support.

...

Sincerely,

Roger W. Briggs
Executive Officer
